What is Perfect Circle?

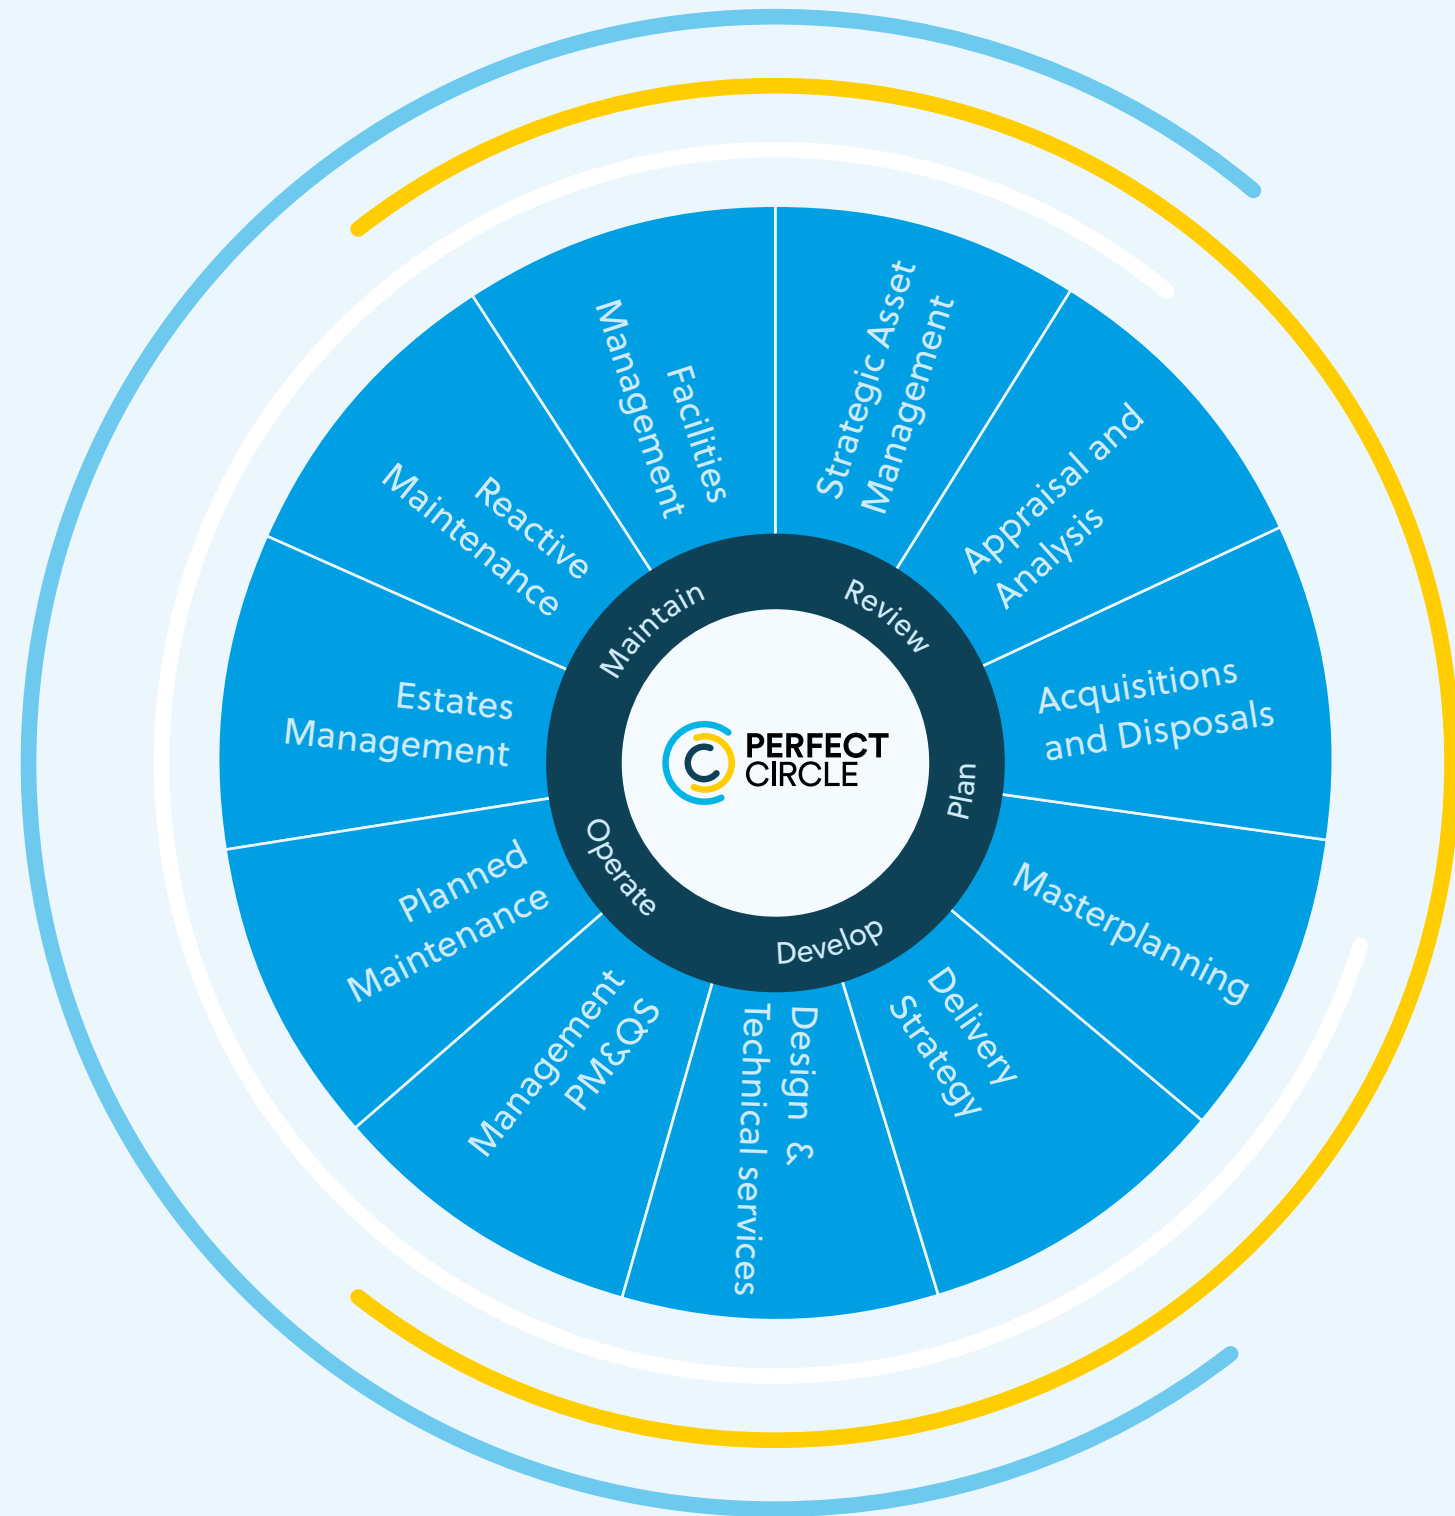

With accelerated access to built environment and infrastructure experts, Perfect Circle is an industry-leading partnership providing advisory, consultancy, professional and technical services.

Operating across the full range of sectors, as a collaborator we bring the market together to offer simple, speedy access to the most extensive team of experts in England, Wales and Northern Ireland.

We provide clients with a diverse, integrated, and local team of specialist suppliers, achieving value for money, efficiency and local economic impact.

Perfect Circle combines innovation with governance, collaboration and excellence to deliver the broadest range services to the public sector with a procurement compliant, direct contracting model via SCAPE Consultancy frameworks.

A complete consultancy solution

Through our strategic partnership of collaborative businesses and extensive supply chain we advise and act on the complexities of planning and managing real estate, or by designing sustainable solutions for vital infrastructure, energy and environment preservation, public service delivery or investment assets.

Whether it's professional advisory, consultancy or technical design services, we have the diversity, scale and expertise to deliver on every challenge our clients face.

With proven team capabilities, strong relationships and trusted partnerships, we provide an agile resourcing approach to shape the

right team with you, for superior outcomes and sustainable value.

With more than 35,000 professionals across multiple disciplines, we have the depth of technical resource to help you realise the full potential of every project.

Resilience
through an alliance of best in class global, national and local consultants in an collaborative ecosystem

Deliverability
with a Commissioning Gateway for Infrastructure and Built Environment projects which is simple single contract, sole provider direct award

Legacy
creating and maximising opportunities for local people and businesses to deliver a lasting and meaningful impact in the communities we serve

Strategic solutions and practical advice

We recognise that the public sector continues to face intense pressure in meeting the needs of communities and economies with a landscape of competing demands for constrained capital and revenue budgets, rising costs, staff shortages and environmental targets. Adherence to procurement regulations, whilst ensuring value for money, adds further challenges.

At Perfect Circle we understand the nuances of procurement risk and value management. We offer a fully compliant solution to support decision making, with procurement at pace, savings on cost and quality in performance.

What is SCAPE Consultancy?

A direct award framework, delivering real value for local communities

Perfect Circle offers the most efficient procurement route for clients via SCAPE, one of the UK's leading public sector procurement authorities, and its direct award Consultancy framework, which drives collaboration and efficiency, and delivers time and cost savings.

Supporting you at every stage

Perfect Circle was appointed to SCAPE Consultancy in January 2021 having previously delivered SCAPE's Built Environment Consultancy Services (BECS) framework since 2016. This framework will run until January 2027.

SCAPE is a not for profit local authority-owned entity, where all surplus profit is reinvested in the public sector. It is the only public sector

framework to have been recognised as a Champion of the Construction Leadership Council's Carbon Reduction Code and is dedicated to creating spaces, places and experiences that leave a sustainable legacy within the community. Since 2006, SCAPE has accelerated over 12,000 projects across the UK with their direct award frameworks, property services and innovative architectural designs.

What are the benefits of procuring a project with Perfect Circle?

Speed of appointment

saving time on procurement and project commencement.

Ease of access

to industry leading experts.

Flexibility

to form the team that you want.

Single appointment

single process, single point of responsibility.

Complete

procurement compliance.

Certainty of value for money

open market tendered rates, benchmarked for value.

Governance and compliance

in framework management.

Best practice,

of an established, framework and delivery partner.

Integrated social value

adopting the National TOMs approach

Depth of client support and advice

our network of regional leads.

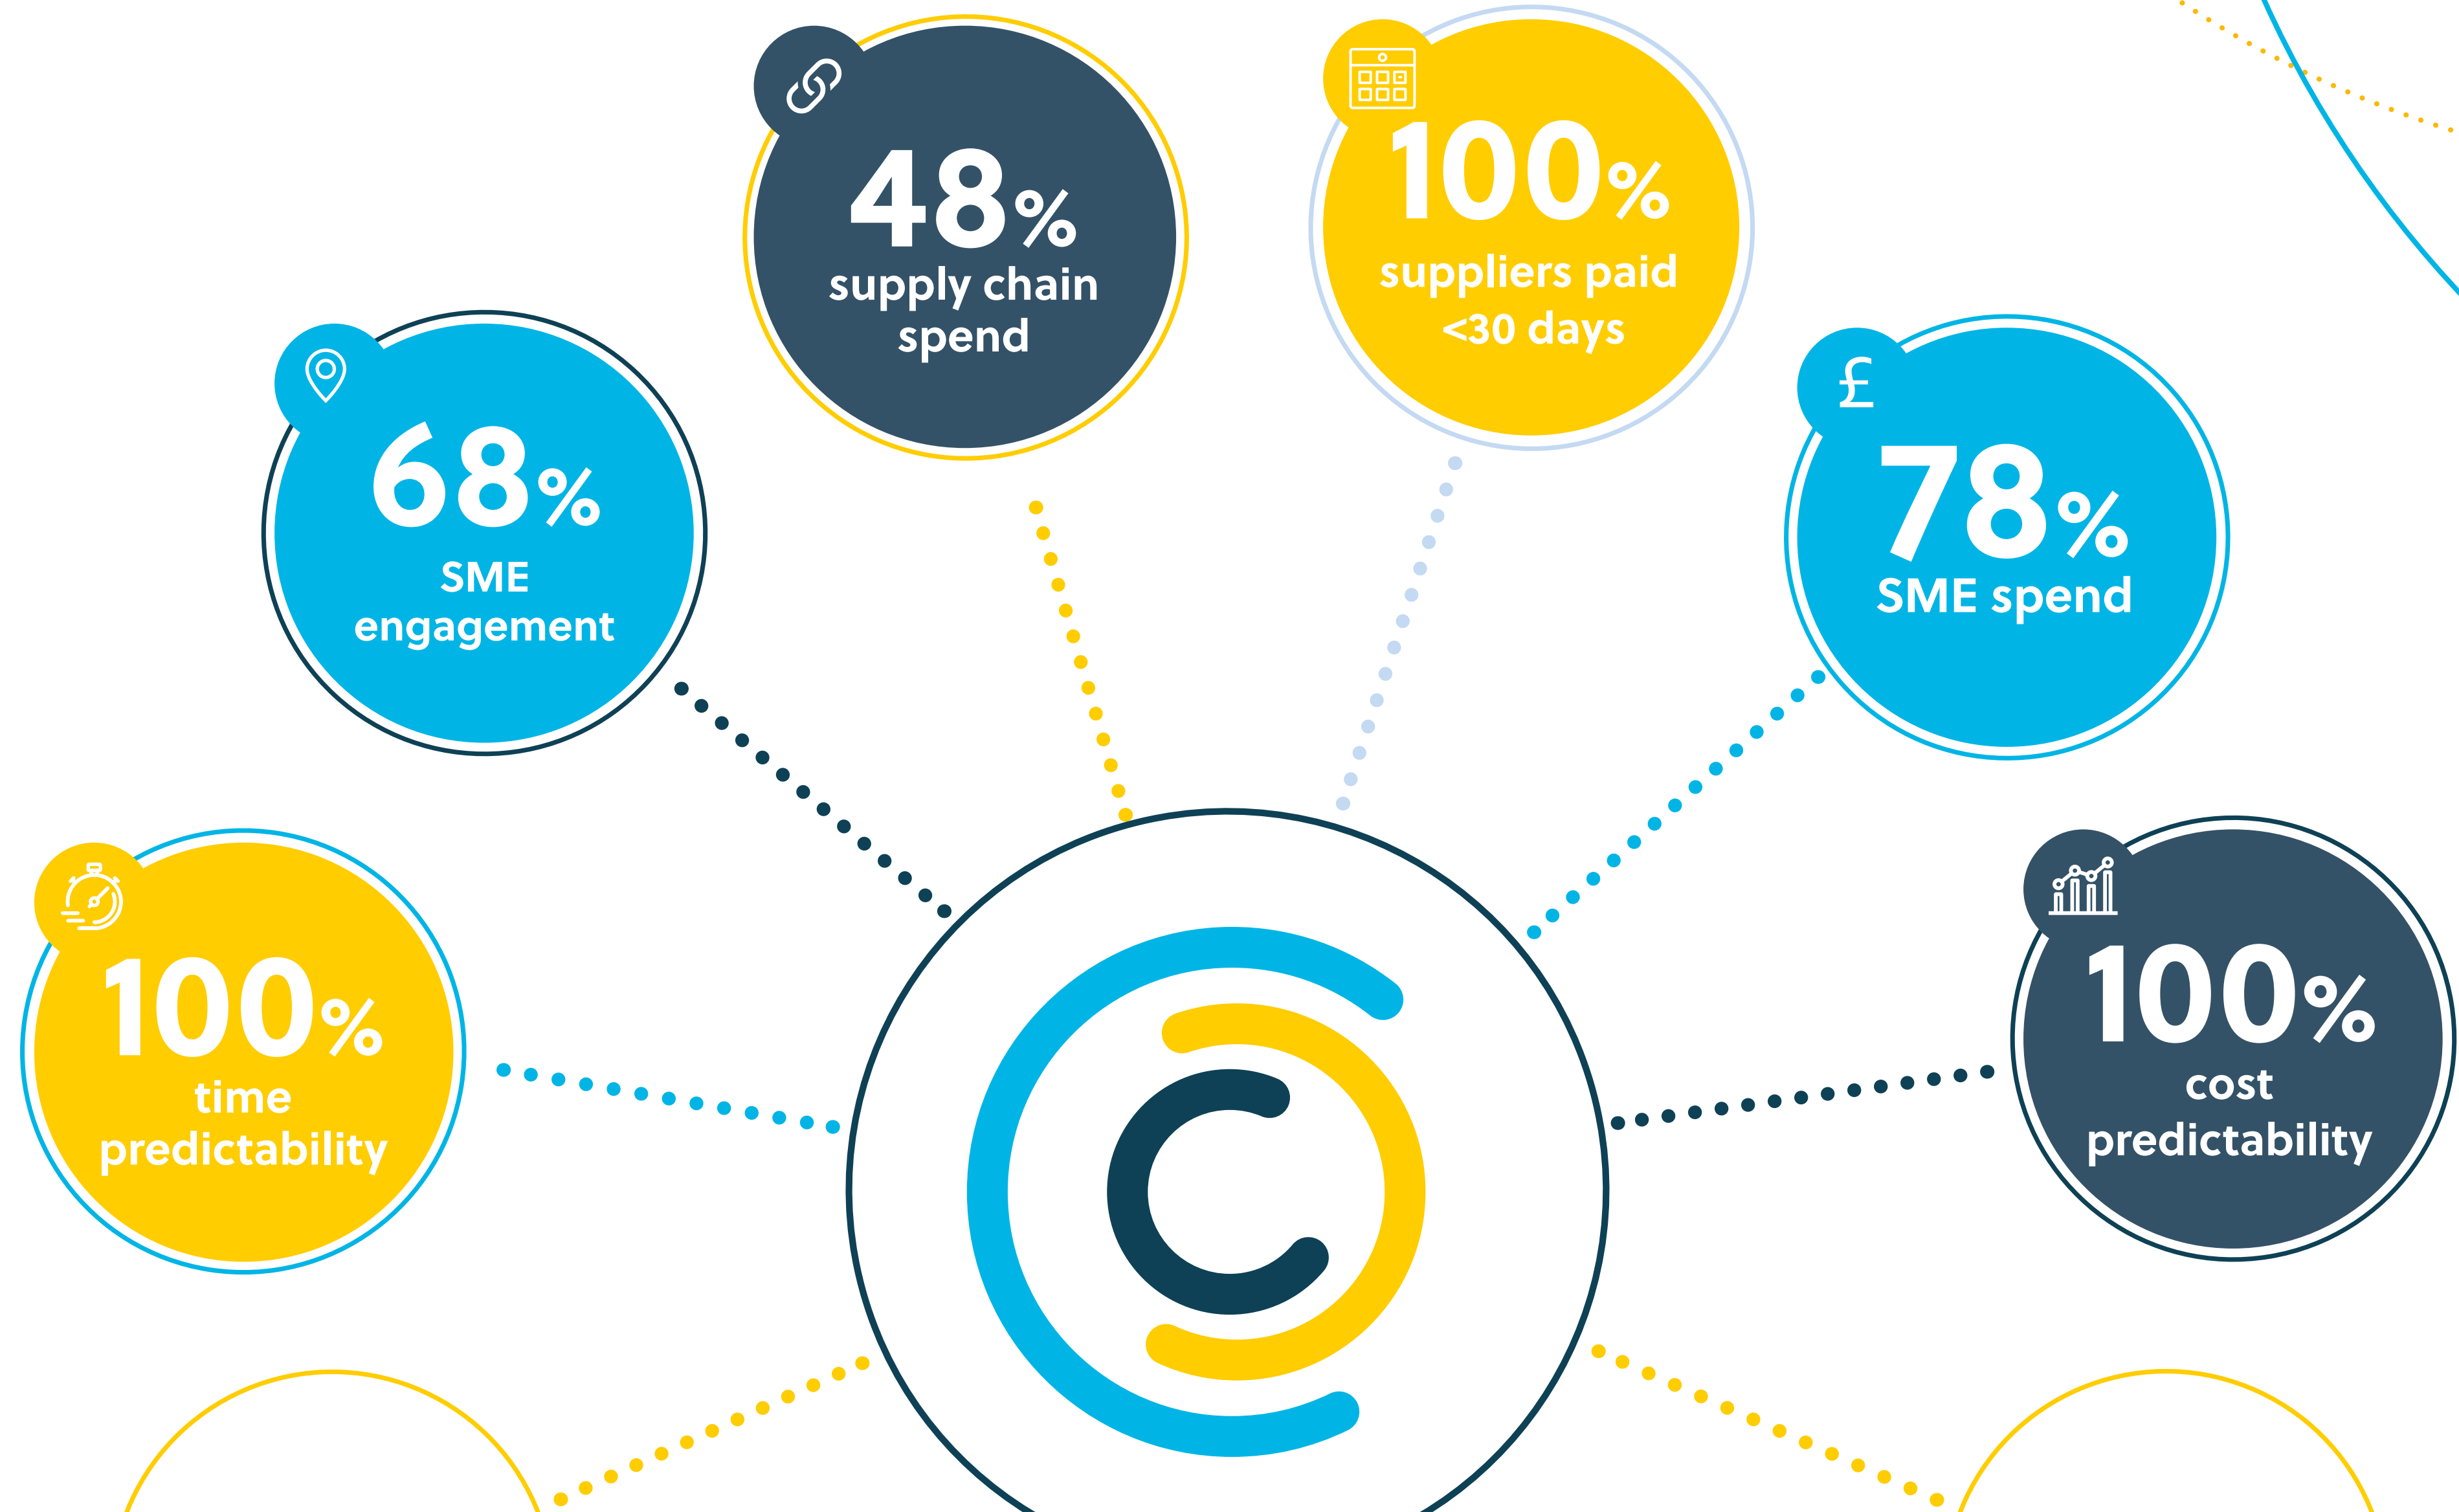

You're in good company

We are immensely proud of the success we have achieved with SCAPE since 2016, and the strong relationships we have forged with clients and our network of supply chain partners.

Our public sector clients have benefited from significantly reduced procurement time and savings for the public purse. Together with SCAPE, we have delivered real value, ensuring social, economic and environmental benefits sit at the heart of every project – enabling clients to unlock true social value and create a lasting legacy for their communities.

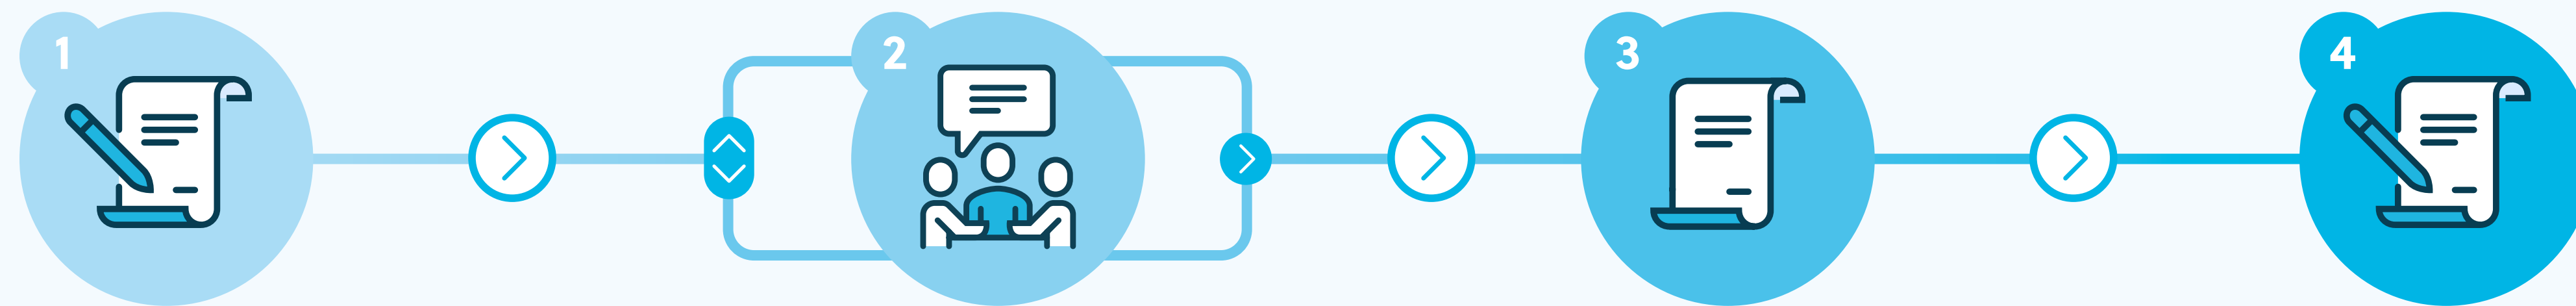

Working with Perfect Circle

Appointment journey

Accessing our services via SCAPE Consultancy is simple, quick and efficient. Follow these simple steps below.

Step 1
Complete a SCAPE Access Agreement
This is a simple form that we can request on your behalf and which carries no cost or commitment and can be signed digitally via DocuSign.

Step 2
Explore your service options
Discuss your requirements directly with Perfect Circle, or with your existing trusted Perfect Circle Partner. Shape your service delivery team with a Lead Partner and Supply Chain Partners.

Step 3
Service Request Proposal provided by Lead Partner
This sets out the brief, scope of services and fees.

Step 4
Delivery Agreement signed and commission launch
Using the highly flexible NEC3 Term Service Contract and the NEC4 Professional Services Contract (long or short form), the Delivery Agreement will set the commercial and technical parameters of our appointment, in line with the overarching Framework Agreement.

A-Z List of services

Access Consultancy (DDA)	Cost Benefit Analysis	Geotechnical Engineering	Mineral Resource & Reserve	River Basin Management	Technical Review & Audit
Acoustics & Vibration	Cost Consultancy	Grant Advice	Mirco-climate Modelling	Route Developments & Upgrades	Telemetry Systems
